Personal Profile

Data scientist with 4+ years of experience leading end-to-end analytical projects using causal inference, Python/R, SQL, AI tools, and large-scale data systems. Built quasi-experimental and predictive models on multi-million-observation datasets, designed robust data pipelines, and translated complex analyses into actionable insights for technical and non-technical stakeholders.

Experience

- **Data Science Projects:** Led the full research cycle on large-scale analytical projects:
 - Developed a causal modeling framework using cross-fitted Ridge and XGBoost instrumental variables to estimate the effect of platform (Twitter) adoption on downstream performance outcomes of scientists in a complex network setting
 - Designed a staggered causal analysis on daily panel data across 100 websites to quantify the impact of news subscription rollouts, finding average traffic declines of 25–30%
 - Trained and evaluated an XGBoost model measuring users' propensity of paying for subscriptions, identifying heterogeneous effects of subscriptions across user types
 - Designed and implemented a large-scale entity-matching pipeline (API retrieval, ML pre-filtering, LLM evaluation) and coordinated 10 research assistants for manual validation, achieving >98% validated accuracy on 300k candidate profiles
 - Built and maintained a large-scale analytical dataset on academic research spanning 80k individuals, 1M publications, 80M citations, and 500+ engineered features by integrating APIs, web scraping, SQL databases, and NLP pipelines
- **Teaching Assistant, Bocconi University, Italy:** Designed and delivered theory, statistics, and ML lectures to mixed technical and non-technical audiences; mentored students on analytical projects (Undergraduate & Graduate) 2021 – 2026
- **Research Assistant, ZEW – Leibniz Institute, Germany:** Analyzed competitive dynamics in digital platforms; produced visualizations and analytical summaries for internal discussion 2018 – 2019
- **Consulting Intern, EY Innovalue, Germany:** Worked with international payment technology provider to deliver market analyses and strategic recommendations as executive slide decks 2018

Education

PhD Economics, Bocconi University, Italy

Sep 2020 – Jul 2026

- **Awards:** German Academic Scholarship Foundation, Bocconi PhD Scholarship, Invernizzi Scholarships 2024, 2025 (€100,000+)
- **Grade:** cum laude (highest honors)

Visiting Fellow, Harvard University, United States

Jan – May 2025

- Invited researcher sponsored by Prof. Jim Snyder; presented ongoing work in seminars and engaged with faculty

MSc & BSc Economics, Mannheim University, Germany

2014 – 2020

- **Specialization:** Theoretical & Applied Econometrics (Statistics), Online Platforms
- **MSc Grade:** 1.0 / 5.0 (1.0 is best), with distinction
- **BSc Grade:** 1.4 / 5.0 (1.0 is best), top 10%

Abitur

2014

- Skipped grades 3 and 9

Skills

Programming & Data	Python (pandas, numpy, scipy, statsmodels, sklearn, xgboost, matplotlib, seaborn, sqlite3), SQL (BigQuery, SQLite), R (tidyverse, dplyr, fixest, mlr3, ggplot2)
Causal Inference	A/B Testing, Double/debiased ML, causal forests, quasi-experimental methods, staggered designs, synthetic controls, regression discontinuity, instrumental variables, policy evaluation
Modeling	Regression, classification, generalized linear models, gradient boosting (XGBoost), random forests, uplift modeling, propensity scoring, feature engineering, cross-validation, hyperparameter tuning
Data & Systems	Large-scale data processing, panel & longitudinal data, NLP (text), geospatial data, APIs, web scraping, SQL databases, parallelization, high-performance computing, GPU computing
Tools & Engineering Languages	Docker, Git, Claude Code, Codex, PyCharm, Slurm German (native), English (fluent), Italian (basic)

Activities

Volunteer Student Mentor at Boarding School Schloss Hansenberg

since 2024

Violinist at University Orchestra Mannheim

2015 – 2019

Member & Elected Representative in Economics Student Union Mannheim

2014 – 2019

Certified skiing instructor in Tyrol, Austria

2015 – 2017
